ABOUT SWIFTIVITY®

Swiftivity® provides proprietary EDI solutions and clearinghouse technology for workers' comp prior authorizations, medical billing, and claims processing. We deploy a suite of enterprise integration tools to perform affordable EDI data mapping, including conversion and transformation for seamless integration and efficient implementation.

KEY DIFFERENTIATORS

- Enhances utilization review compliance
- Minimum or full Intergration options available including single sign-in
- Conference call feature eliminating phone tag and treatment delays
- Provider and payor portals tracking all authorization statuses with an audit trail
- State mandated forms conversion; includes: electronic signatures, exchange authorizations requests with notifications for all key stakeholders

HOW OUR SYSTEM WORKS

Our billing module transmits 837 formatted bill & corresponding records

Prior Authorization Module

REQUEST AUTHORIZATION

Medical provider electronically requests payor authorization, along with uploaded supporting documentation, via simple to use secure web-based system interface.

REVIEW /DECISION

Payor reviews incoming documentation, makes a decision to approve/deny or, efficiently requests more information and/or coordinates a conference call from reserved time block for a live discussion.

REAL-TIME INTERFACE

Keep everyone in the loop. Conveniently include multiple parties to the claim. Improve decision making timelines and reduce authorization delays.
